Walter,

I listened to your vmm of earlier this evening. OXY would like the sentence that we have discussed with regard to de micromis designations and settlements to be included in the cover letter, and we would like dioxin, PCBs and Hg listed therein. To be crystal clear, the sentence referred to is the one you read to me today: "With respect to de micromis settlements, in general, EPA is unlikely to consider such settlements suitable for entities that arranged for disposal for dioxin, PCBs or mercury into the lower 8.3 miles of the Passaic River."

Please call me with any questions. Probably best to try my cell first. We are almost there.
Thanks.

Larry
